

MAGIO MS-1200FW Refrigerated / heating circulator

As with all circulators from the MAGIO range, the refrigerated circulators stand out thanks to their premium quality, high performance and intuitive operation. The devices offer extra strong pressure and suction pumps, thus fulfilling the highest demands for temperature control of external applications. Whether in basic research, material testing or technical systems – the MAGIO refrigerated circulators offer high-tech solutions for high customer requirements.

Despite its very compact design, the water-cooled Refrigerated / heating circulator MAGIO MS-1200FW, which has a working temperature range of -50 ... +200 °C, delivers a powerful cooling capacity of kW at 20°C. Water-cooled systems are normally more efficient than air-cooled systems, as water has a higher specific heat capacity than air. In addition, they introduce far less waste heat into the environment, which helps create a pleasant working climate.

This cooling machine works with natural, environmentally-friendly refrigerant and was developed with a focus on energy efficiency. This means significant savings up to 70% on the operating costs for numerous applications, which also means rapid amortization of the procurement cost. At the same time, the lower energy consumption positively contributes to climate protection.

High resolution TFT touch display

The modern TFT touch display gives you all the important information at a glance. Three large, predefined main screens clearly display data and graphics with various application priorities. Menu navigation is self-explanatory, arranged by relevance to daily operations and easy to operate with the touch of a finger. The in-built help function provides detailed support in case of additional questions.

Product features

- Ideal for demanding external applications
- Simple control of complex applications
- Continuously adjustable, extremely powerful pressure / suction pump
- Flow rate 16 ... 31 l / min, pressure 0.24 ... 0.92 bar, suction 0.03 ... 0.4 bar
- Large, high-resolution TFT touch display with multilingual user interface
- Parts being in contact with the medium made of stainless steel
- Integrated programmer
- Integrated external Pt100 connection
- USB connection
- RS232 interface for online communication
- Ethernet
- analog interfaces (accessory)
- Class III (FL) according to DIN 12876-1

- Connections for solenoid valve
- Integrated pump connection M16×1

Performance values

230V/50Hz (Schuko Plug - CEE 7/4 Plug Type F)	
Heating capacity kW	2
Viscosity max. cSt	70
Pump capacity flow rate l/min	16 ... 31
Pump capacity flow pressure psi	3.5 ... 13.3
Maximum suction psi	-0.4 ... -5.8
Power consumption A	11

Order No.	9032728.N1.33				
Cooling capacity 1 (Ethanol)					
°C	20	0	-20	-30	-40
kW ¹	1.26	1.11	0.64	0.39	0.22

Note about natural refrigerants:

Temperature control units using natural refrigerants are often subject to regulatory requirements regarding the installation site, operation, transport or disposal of the units. If you have any questions, we will be happy to advise you.

Refrigerant stage 1

Refrigerant	R1270
Filling weight g	85
Global Warming Potential for R1270	2
Carbon dioxide equivalent t	0.00017

¹ Performance specifications measured in accordance with DIN 12876. Cooling capacities up to 20 °C measured with ethanol; over 20 °C with thermal oil unless otherwise specified. Performance specifications apply at an ambient temperature of 20 °C. Performance values may differ with other bath fluids.

Technical data

Available voltage versions	
Order No.	9 032 728
Available voltage versions:	
9032728.N1.33.chn	200-230V/50-60Hz (CN Plug) (R1270)
9032728.N1.33	200-230V/50-60Hz (Schuko Plug - CEE 7/4 Plug Type F) (R1270)
9032728.N1.04	200-230V/50-60Hz (UK Plug Type BS1363A) (R1270)
9032728.N1.05	200-230V/50-60Hz (CH Plug Type SEV 1011) (R1270)
9032728.N1.22	100-115V/50-60Hz (Nema N5-20 Plug) (R1270)

Bath	
Bath tank	Stainless steel
Bath cover	integrated

Cooling	
Cooling of compressor	1-stage Water
Cooling water pressure max. psi	87
Recommended cooling water properties	
Cooling water temperature range °C	30
Cooling water difference pressure psi	4.4
Cooling water consumption l/min	1.1

Other	
Classification	Classification III (FL)
IP Code	IP 20

Usable bath opening in. (W x L / D) 7.1 x 5.1 / 5.9

Pump function Pressure Suction Pump

Pump type Immersion Pump

User Interface Language Chinese, Czech, Dutch, English, French, German, Italian, Japanese, Korean, Polish, Portuguese, Russian, Spanish, Turkish

Electronics

Interfaces	Ethernet, Modbus, RS232, RS485, Stakei, USB
External pt100 sensor connection	integrated
Integrated programmer	8x60 steps
Temperature control	ICC
Absolute temperature calibration	10 Point Calibration
Temperature display	7" TFT Touchscreen
Temperature setting	Touchscreen
Electronic Timer h:min	00:00 ... 99:59

Dimensions and volumes

Weight lbs	97
Dimensions in. (W x L x H)	13 x 18.5 x 27.6
Filling volume l	5 ... 7.5
Pump connections	M16x1 male

Temperature values

Setting the resolution of the temperature display °C	0.01
Working temperature range °C	-50 ... +200
Temperature stability °C	±0.01
Ambient temperature °C	+5 ... +40
Setting the resolution of the temperature display °C	0.01

Included in delivery

2 Barbed fittings for tubing 8 and 12 mm ID. (Pump connections M16x1 male)

All Benefits

Intelligent temperature control.
Intelligent cascade control - automatic and self-optimizing adaptation of the PID control parameters with external stability of +/- 0.05 °C.

Many interfaces.
Straight-forward remote control, data management, and integration into process structures. USB, Ethernet, RS232, SD card, and alarm off are permanently integrated. Further interfaces available as accessories.

Touch display. Perfect operation.
With the touch display, the user always has an overview of all values and functions. The intuitive and multilingual menu structure enables perfect control.

Maximum safety.
Classification III according to DIN12876-1 enables safe operation, even with flammable fluids. Automatic switch-off in the event of high temperature or low liquid level.

Space saving. Free up space.
Place your JULABO Circulator right next to an application, another unit, or wall. That saves space. This is made possible by eliminating vents and connections on the sides.

Multi-lingual.
Operation in multiple languages.

Programmer. Integrated.
The integrated internal programmer makes it possible to automatically run temperature time profiles.

Analog I/O.
Analog interfaces for integration into process control systems (optional).

Temperature. Under control.
External Pt100 sensor connection for precise measurement and control directly in the external application.

Fill level. Monitored.
Fill level indicator on the display for heat-transfer liquid.

Process stability.
Early warning - visual and acoustic - of critical states increases process stability.

Process. Under control.
Full control of the dynamic, access to all important control parameters for individual process optimization.

Stable. Mobile.

Energy-saving.
The high-quality insulation of all relevant components saves energy.

Everything made of stainless steel.
Quality and material compatibility at the highest level. All parts in contact with the medium are entirely made of stainless steel.

Most powerful pump.
The integrated pressure/suction pump with performance values of 0.9 bar and -0.4 bar is the most powerful in its class and continuously adjustable.

Wide range.
Refrigerated and heating circulator in various combinations, circulator in various sizes. Maximum flexibility through a large selection of accessories.

Condensation protection.
Superb design solution. Integrated ventilation directs air over the bath lid and minimizes condensation.

Connection. Easy.
Inclined pump connections (M16×1) facilitate the connection of applications. Each unit includes 2 barbed fittings of 8/12 mm diameter each.

Highest measuring accuracy
'Absolute Temperature Calibration' for manual compensation of a temperature difference, 10-point calibration
